

The revised Chapter 4 specifies planning requirements for school entities. A school entity is defined as a local education provider (e.g., public school district, charter school, cyber charter school, AVTS or Intermediate Unit).

These planning requirements are summarized:

- a. Every 3 years, a school entity must submit to the Secretary for approval a professional education plan. The professional education plan must be made available for public inspection and comment for 28 days, and then it can be approved by the board and then submitted to PDE.
- b. Every 6 years, a school entity must submit to the Department for approval an induction plan. The induction plan must be made available for public inspection and comment for 28 days, and then it can be approved by the school entity's governing board and then submitted to PDE.
- c. Every 6 years, a school entity must develop and implement a comprehensive and integrated K-12 program of student services. This student services plan must be made available for public inspection and comment for 28 days, and then it can be approved by the school entity's governing board.
- d. Every 3 years, each school district must develop and submit to the department a special education plan. The special education plan must be made available for public inspection and comment for 28 days, and then it can be approved by the school entity's governing board and then submitted to PDE.
- e. Every 6 years, each school district must develop and implement a gifted education plan. The gifted education plan must be made available for public inspection and comment for 28 days, and then it can be approved by the school entity's governing board.
- f. Every 3 years or when the plan is amended, a school district offering a prekindergarten program must submit an implementation plan. The implementation plan must be made available for public inspection and comment for 28 days, and then it can be approved by the school entity's governing board and then submitted to PDE.

The Comprehensive Planning process and web application can still be used to meet all of the planning requirements outlined in the revised Chapter 4.
